Melissa, FYI Vince ----- Forwarded by Vince J Kaminski/HOU/ECT on 03/07/2000 04:19 PM -- ----- From: Edson President 03/07/2000 04:07 PM Sent by: Edson Duran To: All Lie Group cc: Vince J Kaminski/HOU/ECT@ECT Subject: TR-51 It's time to finalize the TR-51. The test has been executed and we need to finalize the results. I would like to know who will be the contact person (?) in order to give me the final results for the following: 1. To request the promotion of one of our traders in order to cover the liquidation position; 2. Obtain approval of the sending of the promotion of one of our internal traders in order to minimize the liquidation position; 3. Request an approval for the closing of a position from the counterparty and make a good trade, thus the closing of the position will minimize the liquid

## What's New in the ChildWebGuardian Pro?

ChildWebGuardian Pro is an Internet connection filtering application designed for helping you create a safe and secure environment for your children. It comes with a bunch of blocking options and IE usage restriction mode. Prior configuration settings When you run the utility for the first time, you are welcomed by a wizard that offers step-by-step assistance throughout the entire configuration process. ChildWebGuardian Pro gives you the possibility to set up a master password in order to prevent other users from making changes to the program's functionality and uninstalling it. In addition, you can add your email address so you can recover the password in case you forget it. What's more, you can choose between three different profiles (each one comes with its default settings), namely Home, Office or School computer. It is recommended to have a personal account for every person who uses the computer so you can apply the settings individually. By default, all computer users are in the restricted profile. Last but not least, you should restart the PC at the end of the configuration wizard in order to make sure all settings have been applied accurately.

**Clean feature lineup** ChildWebGuardian Pro offers a well-organized suite of features that enables you to easily configure program settings, set up various filters, view neighboring computers, as well as check out the log file.

**Filter data based on forbidden words** The utility helps you block Internet content that includes several forbidden words. The bad words are organized with the aid of different categories (e.g. Drugs, Gambling, Terrorism), and you can enable or disable them, as well as create a custom list with forbidden words. In addition, you may allow a user-defined number of forbidden words and look for inappropriate data in websites, incoming email messages and incoming ICQ messages.

**Web filter** ChildWebGuardian Pro helps you schedule the allowed time for web surfing, block forbidden websites based on blacklists, as well as select the downloads that you want to block, namely executables, archives, torrents, images, Flash videos, audio and video files. Furthermore, you may create a whitelist of websites that are safe to navigate on and block ads and social network sites.

**ICQ, email and program filter** For an extra layer of protection, you may limit the usage of ICQ and email by time and allow sending/receiving of ICQ and email messages only for/from several numbers. The program filter can be used in order to allow custom software apps or games to run on specific days of the week.

**Remote connections and logs** You can view the computers in your local network with ChildWebGuardian Pro, save data to a log file, store the log for a custom number of days, select the events that you want to include in the log (e.g. visited websites, blocked websites with forbidden words, blocked downloads),
